

Managing covid cases at work

It is unavoidable that once in a while someone may be COVID positive in the workplace. Use this checklist to help stop the spread:

Ensure areas are well ventilated

- o Open windows
- o Work outdoors where possible

Encourage personal protective measures

- o Wear masks
- o Practice social distancing

Maintain good hygiene practices

- o Wash hands regularly
- o Use hand sanitiser after touching common surfaces
- o Use disinfectant

Encourage staff who become unwell to **stay home** or **work from home**.
