1 Longitude6

Introducing ErgoEdge

ErgoEdge is an AI-powered ergonomics tool that uses computer vision to turn smartphone videos into detailed posture and movement analyses - no sensors or special hardware required.

Delivers clear risk insights, visual reports, and practical recommendations, helping teams improve workplace safety with ease and accuracy.

What's included:

- 25 ergonomic risk assessments
- Training & live support
- PDF report for each assessment
- Executive report with consolidated findings and recommendations to reduce the risk score in 10 of the highest scoring assessments.

RRP: **\$3,525**

EML customers price: \$2,950

Saving: \$575

2 Staunch Technology

Job Task Analysis and JobFit System access

Staunch Technology's comprehensive Job Task Analysis (JTA) includes 43 working postures, 35 manual handling measures, psychosocial demands, environment and PPE.

Used in conjunction with their patented JobFit System, employers have the power to match a worker's functional capabilities to their job demands, supporting return to work, pre-employment testing and injury prevention strategies.

What's included:

- 2 days of expert consulting onsite for a detailed Job Task Analysis (8-12 tasks)
- Full job demands report with Ergonomic Risk Ratings
- PDF reports of each task assessment
- Additional 2 months access to the JobFit System platform

EML Group SME customers can access this for just **\$5,000 (+GST)**. Normally \$7,450 (+GST), that's a **saving of \$2,450 (+GST)**.

T&Cs apply.
